Sat 27/4	H Harrogate Railway Athletic	3:00pm

Our visitors today are Barton Town who originally began life as two long established successful separate teams (Town and Old boys) in 1995 the two merged to form Barton Town Old boys and they competed successfully in the local Lincolnshire leagues. They joined the NCEL in 2006/07 after finishing runners up after being denied their place the season before where they were title winners.

The Swans as they are known joined the Premier Division in 2011-2012 and since then they have rarely been outside the top half of the table, the only blip being 2016-2017 where a reprieve sopped them being relegated back to division one. Last season a little bit like ourselves they struggled for quite some time before a late surge saw them comfortably in midtable once more.

For a more detailed view see <http://www.pitchero.com/clubs/bartontownoldboys/>

### Ones to watch:

Gareth Barlow: been there done that. Arguably should be called Mr Barton after scoring his 300<sup>th</sup> odd goal for the Swans last season. Is immense in both boxes having been employed as a striker and centre back during his career.

Joel Sutton: One of the most exciting players in the NCEL in recent years has swapped Bridlington Red for Barton Blue, last season Joel scored 19 goals including two hattricks.

NB: For the last two seasons I've been producing our match day programme the philosophy of which is that I wanted to make them worth your hard earned £1.50 and achieving third place in the league according to programme swap shop in the first season I guess that philosophy worked. however last season that became more and more difficult to do resulting in something that a) I wasn't happy with (the space filling quiz page for one) and b) ended up costing the club money in terms of printing as well as the time taken to produce them for our three teams with me regularly seeing 2am on Saturday morning. So (I appreciate this won't please everyone) for that reason we are still producing a Match day souvenir type publication but one that's probably not technically what you would call a "programme" these days .

Thanks for your understanding

Steven.
